

ARUNYA PULENTHIRAN

Sri Lanka | +94 74 165 8322 | arunypulenthiran@gmail.com

PROFESSIONAL SUMMARY

STEM-focused early-career candidate with interests spanning web development, UI/UX design, Python, data, AI, mathematics, and technology. Builds practical projects to strengthen programming, analytical thinking, and digital design skills, including StudyFlow, a responsive study scheduling website, Math Toolkit, a web app, and Aurelia Studio, a responsive architectural website deployed on Vercel. Combines structured problem-solving with creative visual work and develops technical skills through hands-on projects, coursework, and independent learning.

CORE TECHNICAL SKILLS

Programming & Web: HTML, CSS, JavaScript, Python, SQL, Frontend Development, Server-Side Programming, Responsive Web Design, Website Deployment (Vercel)

Design & Creative: Figma, Canva, Adobe Photoshop, CapCut, Layout & Visual Presentation

Development Tools: Git, GitHub, Vercel, Visual Studio Code

AI & Prompting: AI Fundamentals, Prompt Engineering

Technical Interests: Web Development, UI/UX, Python & Data, AI & Technology, Mathematics

Strengths: Analytical thinking, problem-solving, creativity, attention to detail, independent learning

SELECTED PROJECTS

Aurelia Studio — Responsive Architectural Website

Tech: Deployed on Vercel | Live: aurelia-studio-two.vercel.app

- Designed and built a responsive architectural website that adapts across phone, tablet, and desktop screens.
- Focused on clean layout and visual presentation, and deployed the site live on Vercel from design through to public launch.

StudyFlow — Responsive Study Scheduling Website

Tech: HTML, CSS, JavaScript, GitHub | Live: arunypulenthiran.github.io/Study-planner/

- Designed and developed a responsive, interactive website that helps students plan and schedule their study sessions.
- Built the layout to work smoothly across phone, tablet, and desktop screens.
- Focused on a clear, easy-to-use interface that turns study planning into a simple digital tool.

Math Toolkit — Interactive Web Application

Tech: HTML, CSS, JavaScript, GitHub | Live: arunypulenthiran.github.io/Math-tool-kit/

- Developed a web-based collection of practical mathematics tools using HTML, CSS, and JavaScript.
- Includes calculators for matrix addition, quadratic equations, sequences, and statistics.
- Published through GitHub Pages and included in the personal portfolio.

Python Practice — Programming Project Collection

Tech: Python, GitHub | Repository: github.com/arunypulenthiran/Python-practice-

- Built beginner Python projects to practice programming logic and problem-solving.
- Projects include a Personal Expense Tracker, Number Guessing Game, Student Grade Calculator, and ToDo List.
- Maintained and showcased the work through GitHub and the personal portfolio.

EDUCATION

G.C.E. Advanced Level — Mathematics Stream: Sri Lanka | 2026 (Results pending)

- Combined Mathematics • Physics • Chemistry

G.C.E. Ordinary Level: Sri Lanka | 2024

- 5 A passes (including Mathematics and English) • 3 B passes • 1 C pass

COURSES, CERTIFICATIONS & LEARNING

University of Colombo: Software Quality Assurance — In progress

IBM SkillsBuild: Foundations of Artificial Intelligence — Completion Certificate | September 2026

IBM SkillsBuild: Mastering the Art of Prompting — Completion Certificate | September 2026

University of Moratuwa: Trainee Full Stack Developer — Python Programming, Web Designing, Frontend Development, Server-Side Programming, and Soft Skills

Microsoft Learn: 17 badges and 3 trophies across Microsoft learning activities

University of Colombo: Astronomy Certification

AAT: Level 1 completed

Royal Institute: English Language Programme

PORTFOLIO & ONLINE PROFILES

Portfolio: arunypulenthiran.github.io/Portfolio-/

GitHub: github.com/arunypulenthiran

LinkedIn: linkedin.com/in/arunya-pulenthiran-b65893421

ADDITIONAL SKILLS & INTERESTS

- Mathematics and STEM learning, with an interest in applying analytical thinking to technology.
- UI/UX and visual design, including interface concepts and digital graphics.
- Continuous self-directed learning through online platforms, coursework, and personal projects.
- Music — violin (8+ years), vocals, and piano, demonstrating long-term discipline, consistency, concentration, and commitment to learning.
